

Designed for Fitness and Fun

Brachiating (Overhead Climbing)
- Improves strength and endurance. Promotes rhythmic body movement, hand eye coordination, and the body's awareness of where it is in time and space.

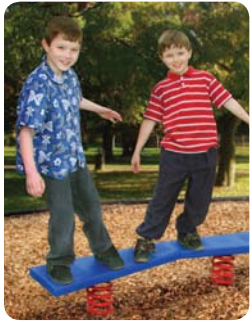

Sliding - Improves leg and hip flexibility. Helps with the development of special awareness, movement experience, and looping. Teaches increased risk acceptance based on attained skills through practice.

Spinning – Helps develop the body's awareness of where it is in time and space. Improves understanding of the characteristics of movement like force, direction, and speed.

Climbing – Promotes muscular strength and flexibility. Develops body management skills on unstable surfaces. Helps with spatial awareness and arm and leg coordination.

Balancing – Helps with body control and positioning when standing still or moving. Promotes strength and endurance throughout the whole body. Introduces mechanical principals important to most sports, such as counterbalance, base of support, equilibrium, and center of gravity.

Swinging – Promotes aerobic fitness and whole body awareness. Helps educate the body in synchronized movement. Demonstrates the importance of timing in transferring energy during movement.

Concept

You have the dream. We have the skill and experience to help you shape the dream of that perfect playground into a workable reality. We can assist you with everything from site evaluations to age-appropriate activities, tips on design, colors and features, and budget concerns - including fund raising.

Design

With your needs and ideas in mind, our highly trained designers and engineers take the next step. Utilizing state-of-the-art CAD technology, they create working drawings that include a top view, site plan, front and back perspectives, and full color 3D renderings so you can see the playground you've envisioned.

Manufacture

Our manufacturing process uses the latest CAM technology to create precision parts and components including climbers and decks, and rotationally molded plastic components like slides and roofs.

Package/Ship

Quality control is extremely important. We check each piece for high quality consistency at every step of production; then prior to packaging, we check for flaws again before the equipment moves on to our shipping department.

Install

With every project shipped, we provide comprehensive and detailed installation instructions specific to that project. We also supply a customized maintenance kit and maintenance instructions.

Play

It's time to reap the rewards of all the hard work, so turn the kids loose to ENJOY!
