

Product Description

The Hill Assist Rope Climber is a fun and unique addition to any outdoor playground. It's designed with a post attached to a 20mm durable rope cabling with handgrips. With one end on a hill and the other below, use the rope and handgrips to assist in ascending the hill. It's available in four standard size options designed for hills with approximately 4', 6', 8', and 10' elevation changes. Actual installation dimensions and climbing experience may vary based on slope conditions, mound shape, and installation configuration. Hill is not included.

4-foot: RC-8375SR

6-foot: RC-8376SR

8-foot: RC-8377SR

10-foot: RC-8378SR
